2. Tools | Recogito: an open-source DIY platform

[Tutorial](#) [About](#)

[Log In](#)

Semantic Annotation without the pointy brackets

Work on texts and images. Identify and mark named entities. Use your data in other tools or connect to other data on the Web. Without the need to learn code.

1+2+3 = | The Pelagios Network as a “community of practice”

The activities of the Pelagios network

Annotation

Supports the use of semantic annotation to link and explore historical place information

Collaboration

Provides a forum for all Project Partners to share resources and collaborate.

Gazetteers

Establishes core requirements for global authority files on historic places and their alignment

Pedagogy

Supports the use of linked data in education and cultural heritage

Registry

Establishes services for registering and discovering linked data collections for places

Visualisation

Develops methods and tools which make use of semantic annotation
